

System Requirements

Everest Web Edition

Server Requirements

- Windows 2003 or higher IIS Server
- 32-bit or 64-bit operating system
- Microsoft® SQL Server™ (all versions supported)
- 2.8 GHz CPU or faster, 2 GB RAM or more, 10 GB Disk Drive or more
- Access to SMTP Server

The applications and the database can reside on the same server or separate servers. The servers can be shared with other applications or it can be dedicated. The Everest application requires less than 20 MB of disk space. The database requires 2 GB/year (assuming 2000 or less attachments a year).

Workstation Requirements

- Microsoft® Internet Explorer™ 5.5 or higher

Components

Software

The Everest Web Software is installed on the Windows/IIS Server. It is a 100% web-based program. No client-side downloads or plug-ins required.

Database

SQL Server™ database (license purchased separately from a Microsoft® reseller).

Event Manager

The Event Manager runs as a service on the application server to automate Scheduled Notifications for Reminder, Past Due and Escalation notices sent via email. The Event Manager also handles automated imports for source data synchronization.
